- A) victor
- B) front runner
- C) runner up
- D) rival

Questions 46-60 are based on reading texts. Mark the right answers considering the reading texts.

The Scot and the tea kettle

According to one story, a Scottish boy watched the steam lift the top off his mother's tea kettle and realized the power of steam to make machines work. That boy, James Watt, would then go on to invent the modern steam engine in 1769. Actually, the history of steam technology records the successful work of several scientists and engineers before Watt. For example, in 1698, Thomas Savery had introduced a simple steam pump to remove water from mines, and 14 years later Thomas Newcomen invented a better pump. But these pumps weren't efficient because they used so much fuel. In 1769, the Scottish boy, James Watt, figured out a way to save three-quarters of the fuel. To honor him, his last name became the name of a unit of energy.

46. The example of the boiling tea kettle shows that steam is

- A) useful
- B) efficient
- C) powerful
- D) necessary

47. The first steam engines

- A) didn't pump water
- B) cost too much to build
- C) were difficult to make
- D) used too much fuel

It's a big country!

When it comes to body weight, Americans stand out. Most visitors to the United States, no matter where they go across this vast country, comment on the size of many Americans. In fact, these impressions are backed by numerous statistics. For example, the average 5'4" American weighs 162 pounds, or 15 pounds more than the average person of the same height from Western or Central Europe. Another comparison: At 150 pounds, the average 5'4" American woman is 24 pounds heavier than her Japanese counterpart.

Why are Americans so heavy? Some blame the American diet. Certainly it's true that Americans eat more high-fat foods – meat, dairy products, and processed food – and fewer grains and vegetables than people in other countries. But fat isn't the whole story. Lifestyle factors – including the tendency for Americans to drive rather than walk or ride a bicycle to work, to snack throughout the day, and to have so many labor-saving devices in the home – appear to contribute to the problem.

48. According to the article, visitors to the United States often comment on the size of the

- A) population
- B) cities
- C) country
- D) people

49. According to the article, the average Western European weighs

- A) more than an American
- B) more than a Central European
- C) less than an American
- D) less than a Japanese person

50. In comparison with Americans, people in other countries eat more

- A) meat
- B) dairy products
- C) processed food
- D) grains

Sneezing

People long ago believed that a sneeze – “a little explosion in the head” – was a.....51..... from the gods which could foretell either good or evil fortune. The present custom of wishing the sneezer good.....52.....or fortune – to forestall possible bad luck – dates back at least to the Ancient Greeks. In the 17th.....53..... it was very impolite to omit the wish, and it was.....54..... to raise the.....55..... and bow at the same time.

Sneezing to the right denoted good fortune...56....., at the start of a journey; but to ...57.....to the left, or near a grave, was...58.....unlucky. Sneezing three times before breakfast is thought to predict a present before the end of the week. Some people it is a sign of good health to sneeze after a meal; anyone who does so regularly after dinner is expected to live to a great age. There are...59.... rhymes connected with sneezing.

One runs: Monday for danger, Tuesday kiss a60....., Wednesday for a letter, Thursday something better, Friday for sorrow, Saturday, see your lover tomorrow.

51.
